

Levious (Vusi) Dhlamini

Test Analyst · Full-Stack Developer

Johannesburg, South Africa

Driver's Licence: Code 10

Nationality: South African

PROFESSIONAL SUMMARY

Test Analyst and full-stack developer with 10 years of experience at SYSPRO, a global ERP software company. Testing expertise spans the complete software lifecycle across multiple major product generations — from SYSPRO 6.1 through SYSPRO 2026 R1 (current GA release) — covering architecture testing, installation and configuration validation, business object testing, and deep specialisation in Reporting Services (Crystal Reports and Wyn Enterprise).

On the development side, experienced in building full-stack software products using C#, .NET 8, React/TypeScript, and Apache Cordova for cross-platform mobile. Strong SQL and relational database background, working knowledge of MongoDB, Docker, and cloud/SaaS deployment patterns. Currently contributing to SYSPRO's SaaS modernisation initiative.

CORE COMPETENCIES

Strong: C# · .NET / ASP.NET · NodeJS · React · TypeScript · SQL / Relational Databases · Visual Basic (.NET) · Crystal Reports · Wyn Enterprise · Computer Hardware & Systems · ERP Testing

Intermediate: Docker / Containerization · MongoDB · Jenkins · Android / Apache Cordova · Python · Playwright / MSTest

Working: PHP · REST APIs · Stripe Integration · WMI · Vite · React Query

PROFESSIONAL EXPERIENCE

Test Analyst

SYSPRO (Pty) Ltd · Full-time

June 2016 – Present · 10 Years

Test Analyst at SYSPRO, a global ERP software company, with 10 years of tenure spanning the complete testing lifecycle across multiple major product generations — SYSPRO 6.1 through SYSPRO 2026 R1 (current GA release). Core testing responsibilities include:

- Architecture testing and validation across SYSPRO platform releases
- Installation and configuration testing across diverse environment setups
- Business object testing — ensuring correct behaviour across complex ERP environments
- Reporting Services specialisation: Crystal Reports and Wyn Enterprise — covering report accuracy, data integrity, and multi-environment rendering
- Authored and maintained the standard test plan templates adopted across the QA team, establishing a repeatable, consistent framework for all release cycles
- Business object test automation using Jenkins — reducing manual regression overhead across releases
- Currently contributing to SYSPRO's SaaS modernisation initiative: supporting DevOps system transition to a SaaS platform architecture, including testing for the new licence manager and updated licensing model

Defect identification track record across major SYSPRO versions:

60% SYSPRO 6	30% SYSPRO 7	50% SYSPRO 8	46.6% Average
------------------------	------------------------	------------------------	-------------------------

SYSPRO Infrastructure Technician

MSA Africa (Pty) Ltd

November 2011 – November 2015 · 4 Years

- Administered SYSPRO ERP environment covering AP, AR, GL, Inventory, Sales Orders, Purchase Orders, WIP, and SRS Reporting
- Wrote SQL queries and developed reports using SQL Report Manager and SRS templates
- Created and configured SYSPRO template documents: invoices, credit notes, picking slips, pro-forma invoices, sales orders, and transfer documents
- Designed SSIS packages for automated report distribution

Levious (Vusi) Dhlamini

Test Analyst · Full-Stack Developer

Johannesburg, South Africa

Driver's Licence: Code 10

Nationality: South African

- Managed SYSPRO users, roles, groups, and granular access controls
- Scheduled and maintained daily SQL database backups; restored from backup when required
- Maintained contract pricing database with multi-currency discount structures
- Created and configured new SYSPRO companies per financial and operational requirements

IT Project Technician

SAMSAC (MSA / SelectPPE)

December 2008 – October 2011 · 3

Years

- Deployed 3G signal and wireless antenna infrastructure across 300+ stores, AngloGold and Harmony mine sites
- Managed Citrix XenServer virtualisation environment; installed and maintained VMs running Server 2000/2003/2008/2012
- Installed and maintained Symantec endpoint protection across 500+ machines; performed virus detection and remediation
- Configured domain accounts, network printers, wireless access points (APN), and standalone workstations
- Maintained and archived IT records for 500+ PCs across the organisation
- Created and maintained SQL/Access database tables for mine protective equipment issuing system

Supervisor · IT Consultant · Network Administrator

Value Added Solution Technology (VAST)

January 2005 – November 2008 · 3

Years 11 Months

- Installed, configured, and troubleshoot network server and client hardware and software
- Designed and constructed networks with clients, servers, media, and connectivity devices
- Programmed ADSL and Cisco routers; managed network protocols and IP addressing
- Managed user accounts, rights, and directory migrations between servers
- Added and upgraded hardware and software components on network servers and devices

PERSONAL PROJECTS

PCClarity

.NET 8 · React/TypeScript · Stripe · Claude API

Active

Windows SaaS application for PC health monitoring and diagnostics. Features a real WMI-based diagnostics backend, React/Vite frontend, Stripe subscription billing (R149/month Pro plan), and an AI assistant dashboard powered by the Claude API.

SciCalcApp

Apache Cordova · JavaScript · Android

Completed

Cross-platform mobile application built with Apache Cordova for Android. Covers physics calculators ($E=mc^2$, kinetic energy, heat transfer), system monitoring (battery, network, device), multi-tab navigation, localStorage persistence, and a self-test suite.

PlaywrightTests

C# · Microsoft Playwright · MSTest · .NET 10

Active

Automated end-to-end browser testing project using Microsoft Playwright with MSTest and C# targeting .NET 10. Covers test discovery, NuGet package configuration, and full browser automation for web application QA.

EDUCATION & TRAINING

Tertiary: National Diploma – Information Technology, UNISA

School: Matric – Westbury Secondary High School (1997)

Levious (Vusi) Dhlamini

Test Analyst · Full-Stack Developer

Johannesburg, South Africa

Driver's Licence: Code 10

Nationality: South African

Additional Training:

- A+ Hardware & Software Installation
- PC Orientation, MS-DOS, MS-Project
- Operating Systems: Windows 95/98/2000/XP/Server 2000–2012
- Introduction to COBOL
- Effective Communication
